Description

Beautifully hand-crafted from tightly woven rattan, our set of 2 beautiful rectangular tray baskets are practical yet decorative. Classic in design and workmanship, this French style basket is a must have. A perfect storage option for organizing and decorating.

Rattan is a close relative of the palm tree. It is a type of a vine that rapidly grows in the jungles of South East Asia. It grows in the shape of a pole, and its diameter varies between one to three inches. Rattan is one of the strongest woods with a strong core and is thus durable and hard to break.

Assorted tray baskets are available in round and oval.
